

SYSTEMS CONTROLS RETROFIT

PRODUCT BULLETIN

A-R-0001

Pre-engineered and packaged Compact Logix PLC-based equipment control systems

BENEFITS :

- Enhanced control functionality such as:
 - Track product activity
 - Develop trend analysis
 - Collect data regarding performance
 - Recipe Memory and Storage
- Enhanced plant integration through networking of independent system controls
- Reduce maintenance by enabling Remote Diagnostic Support
- Energy cost saving with:
 - Auto start up and shut down
 - Energy Saver Mode
 - Energy Consumption Tracking (SECT)

Turn-key installation, with downtime in as little as 2-3 business days

SYSTEMS CONTROLS RETROFIT

PRODUCT BULLETIN

CUSTOMER SUPPORT

APPLIES TO:

- All equipment with
 - An existing Micrologix
- Modernization of any existing relay logic system

Upgrade your existing Micrologix controller that has been declared obsolete and no longer supported by Rockwell/Allen-Bradley.

New retrofit package will offer all existing functionality while also leveraging the new capabilities of the current CompactLogix controller such as remote diagnostics and energy saving.

Package will be installed into existing enclosure and tested by ITS factory-trained technicians during a per defined non-critical time frame.

PACKAGE INCLUDES:

- Control system engineering and software development
- All equipment installed and tested
- Operator and maintenance training
- Documentation
- Required spare parts
