

BURNER TUBE UPGRADE

PRODUCT BULLETIN

A-R-0006

Extend the life and efficiency of your burner system by upgrading your existing tubes

BENEFITS:

- Upgraded material improves heat transfer
- Tube thickness options for flexibility and increased durability
- Maxon and Eclipse certified designs and parameters utilized
- New tubes assembled by certified welders for quality
- Mounting flange and hardware replaced to minimize leakage and improve ease of inspection
- Improved heat-up times and reduced flame-outs

Turn-key installation completed in as little as 1-3 days

BURNER TUBE UPGRADE

PRODUCT BULLETIN

APPLIES TO:

- Indirect-fired Ovens
- Gas Heated Washers

Upgrading your burner tubes is a great way to improve the efficiency of a burner as well as the air cleanliness of an electric heater. ITS will replace your existing burner tube system with a custom-engineered solution incorporating higher grade material and a thicker pipe wall.

The ITS Extended Life Burner Tube enhances your original design with premium material where it matters most. This upgrade virtually eliminates flame-outs and poor heat-up times, while improving your production throughput and the equipment's efficiency.

PACKAGE INCLUDES:

- Design and manufacturing of upgraded replacement tubes to your precise dimensions
- Field replacement by ITS factory trained technicians
- Production tuning for maximum performance
- All recommended spare parts

Enjoy longer life and more efficient operation!
