

# SLIDE BED RETROFIT

## PRODUCT BULLETIN

M-R-0001

The Slide Bed package utilizes a proprietary plastic resin bed that will significantly reduce maintenance, improve performance, and reduce energy costs.

### BENEFITS:

- Significantly lower coefficient of friction between bed and belt
  - Increases performance
  - Reduces energy consumption
- Improved wear characteristics vs. traditional stainless steel
  - Eliminates the maintenance cost of periodically flipping belt to extend its life
  - Longer operating life and thus reduced lifecycle cost
- Includes new adjustable brushes between sections that reduce carry over of water and contaminants

Turn-key installation completed  
in as little as 1 week

# SLIDE BED RETROFIT

## PRODUCT BULLETIN

### APPLIES TO:

- Any conveyor washer with a flat wire belt

This new design offers superior wear characteristics compared to the standard stainless steel slide beds for improved slide bed and belt life. The slide bed will feature stainless steel support structure with a proprietary plastic wear surface.

The fully installed retrofit also includes an adjustable brush system for multi-zone machines to limit zone-to-zone water and contaminant carryover.

The kit can be utilized in any application including Non-ITS equipment and will be specially designed to fit any equipment configuration or size.

### PACKAGE INCLUDES:

- Turnkey installation by ITS factory-trained technicians
- Composite slide bed
- Belt brushes
- Can guides

This simple retrofit saves you time, money, chemicals, water, and energy.
